

TENAX

Armaflex

DESCRIPTION

TENAX ARMAFLEX offers high flexibility and is particularly suitable in areas which are subject to ground settling; it is the ideal solution for any kind of brick-work, particularly those presenting irregular surfaces and for any kind of damaged wall.

BENEFITS

- Easy to lay
- Highly flexible
- Resistant to chemical agents
- Unaffected by alkali
- No interference with magnetic fields
- Light, flexible and easy to shape

USES

- For plaster reinforcement with a minimum thickness >1 cm for following supports:
- Plaster for coating subject to detachment
 - Damages floors
 - Walls made of bricks, stones, tuff or damaged concrete
 - Walls with irregular surfaces
 - Walls in thermo bricks
