GP-Flex[®]

GP-Flex[®] is the new generation grass protection mesh. While the previous TENAX grass protection mesh proved to be one of the most robust and reliable solutions in the world for protecting grassed areas from pedestrian and vehicle damage, we identified a need for developing these products further to include an improved element of slip resistance and flexibility, the result being GP-Flex[®]!

GP-Flex[®] has been tested for slip resistance to BS 7976-2 and when tested alongside other slip resistant grass protection meshes, GP-Flex[®] showed an improvement of over 33% in comparison.

GP-Flex[®] is manufactured using a unique method of extrusion (patent pending), enabling us to incorporate a slip resistant surface and by re-designing the profile, we have made the mesh more flexible enabling quicker installation.

TECHNICAL SPECIFICATIONS

Material
Polyethylene & EVA
(foam)

Color
Bi-Color: green & brown
UV Stabilized

1800g
Weight m2 -1800g
Thickness- 13mm
Tensile strength MD- 788 lb./ft.
Yield point elongation MD- 25%
Residual thickness at 70psi- 55%
Roll size- 6.7' x 65.0'
Roll weight- 159lbs

GP-Flex[®]

- 1800g - Suitable for occasional use of HGV's, access routes for fire engines and refuse trucks

The above uses are given as a guide only. We strongly recommend that you contact us first with your specific requirements in order for us to advise accordingly, however, it should be noted that in all cases the ground should be firm and well drained and the individual ground conditions will determine the suitability for using a grass protection mesh.

ACCESSORIES

Parking Markers

Product Code: 3A032242

Quantity per Case: 100

Color: White

Metal Fixing Pins

Product Code: 2A060016

Quantity per Case: 5000

Color: Gray

4800 East Mowment Street
Baltimore, MD 21205
