

Bar Shelf Netting

- Speeds up glass drying
- Cushions and protects glassware
- Improves airflow, eliminating condensation
- Available in attractive colors to suit your kitchen or bar environment

TENAX CN 27 is an extruded plastic net made from a non-toxic polymer used in kitchen and bar areas. It speeds up glassware drying by improving airflow to the insides of the cups and glasses, thus eliminating condensation.

TENAX CN 27 cushions and protects glassware and china from chipping and breakage, as well as improves hygiene by keeping drinking edge away from bacteria breeding surfaces.
