

Tubular Netting for Packaging Meat Products

● Suitable for food contact

● Precut pieces, clipped or thermowelded available upon request

Extruded from PP and PE, TENAX tubular nets are ideal for cooking and packaging ham, salami, mortadella, sausages, etc. Their elasticity allows them to mold to the shape of the product. For freezing we suggest nets in PE and for cooking meats we recommend nets in PP.

Product	Weight Capacity	Diameter From - To	Color
60 C 121	2.5 kg 5.5 lb	9 - 12 cm 3.5 - 4.7 in	Clear, Red
