

## Tubular Netting for Packaging Mussels & Shellfish

- Suitable for food contact
- Allow the aeration of the products
- Precut pieces, clipped or thermowelded available upon request

**TENAX tubular nets are suitable for packaging all types of shellfish.**

**Their open mesh allows aeration of the products, thus allowing them to remain fresh longer.**

**TENAX tubular nets are also used on automatic packaging lines.**

**The search and selection of polymers and additives - colors - guarantee the absolute suitability for contact with food.**

**The products are custom made according to the need of the customers.**
